

```
public class WaitSleep
{
    private static Object obj = new Object();

    public static void main(String[] args) throws InterruptedException
    {
        Thread.sleep(2000);
        System.out.println( Thread.currentThread().getName() +
            " Thread is woken after two second");

        synchronized (obj)
        {
            obj.wait(2000);

            System.out.println(obj + " Object is in waiting "
                + "state and woken after 2 seconds");
        }
    }
}
```
